Education

University of Information Technology - Vietnam National University — Aug. 2019 to Aug. 2023
Bachelor in Software Engineering — *GPA: 8.1/10*
Relevant Courses: Object-Oriented Programing (OOP), Programming Fundamentals,
Introduction to Computer networks, Operating Systems,
Artificial Intelligence, Software Architecture,
Software Testing, Requirement Engineering

Experience

TISOHA Software Solution — Mar. 2021 - Present
Software Engineer — *Kotlin, .NET, NodeJS, ReactJS, Next.js, AWS*

- Play an active role as a full-stack developer, specializing in web development.
- Handle the collection and interpretation of customer requests, as well as the design and construction of systems, while also providing progress estimates.
- Engage in diverse projects such as Salestime, Iyyara, Atlantic Energy, Auvenir, and FrankSalt.
- Contribute to the training process for interns, taking on responsibilities as both a trainer and evaluator.

Waodate — Aug. 2020 - Feb. 2021
Software Developer — *NodeJS, Flutter, ReactJS*

- Engage in the collaborative development of Waodate and AskAny, two flagship products of the company.
- Take charge of implementing key features essential to the products' functionality.
- Conduct user surveys to gather and analyze requirements, ensuring alignment with user needs.
- Acquired comprehensive insights into the professional development process.

Projects

Salestime — Jun. 2023 - Ongoing
Enterprise Resource Planning (ERP) platform for businesses in Malta — *Kotlin, ReactJS, MySQL, Google Cloud*

- Attend daily development team meetings to report progress updates and receive assignments.
- Lead the implementation of the customer management workflow.
- Take responsibility for the design and user experience (UI/UX) aspects of the application.

Auvenir — Jun. 2023 - Oct. 2023
Cloud-based audit solution for small to medium-sized audits in Canada — *.NET Core, MS SQL Server, Azure*

- Attend daily meetings with the development team to communicate progress updates and receive assigned tasks.
- Responsible for implementing the APIs for the tasks management feature.
- Develop the feature for uploading and downloading files.

Iyyara — Mar. 2022 - Ongoing
Exclusive platform catering to the needs of Halal food enthusiasts — *NodeJS, TypeScript, ReactJS, MongoDB, AWS*

- Facilitate client meetings to gather requirements, provide progress updates, and offer insights on potential app integrations and optimal functional flows.
- Estimate progress and allocate tasks to the development team.
- Design the workflow and create the database for the system.
- Develop unit tests, integration tests, and system tests.
- Establish a management system for deals, plans, rewards, users, and subscribers.
- Lead the design and implementation of the QR Code scan workflow, enhancing the application of deals and reward redemption.
- Identify and address data inconsistencies in existing databases.
- Drive the migration of the current back-end system to leverage state-of-the-art technologies.
- Supervise the subscription system, with a focus on gaining expertise in the 1-on-1 subscription workflow.
- Update existing features of the application to meet the client's revised requirements.
- Deploy the back-end to AWS and optimize cloud usage to ensure cost efficiency for the client.

Atlantic Energy   Jul. 2021 - Jul. 2022

Smart device monitoring system for both home and business environments   *.NET Core, MS SQL Server*

- Engage in daily meetings with the development team, offering progress updates and receiving assigned tasks.
- Take on the responsibility of implementing the synchronization system between databases.
- Support clients in overseeing synchronization batch jobs, promptly addressing and resolving any arising issues.

Frank Salt   Mar. 2021 - Oct. 2021

Digital platform for real estate trading and management in Malta   *.NET Core, MS SQL Server*

- Participate in daily meetings with the development team, providing progress updates and receiving assigned tasks.
- Take responsibility for implementing the APIs for the real estate management feature.
- Tasked with developing the feature to manage users, agents, and administrators.

Ask Any   Aug. 2020 - Feb. 2021

Platform connecting curious users with domain experts seamlessly   *NodeJS, ReactJS, Flutter, MongoDB*

- Engage in daily meetings with the development team, sharing progress updates and receiving assigned tasks.
- Assume responsibility for implementing the user registration and login features, as well as updating user profiles.
- Establish functionality for experts to add their skills and certifications.
- Develop the feature allowing users to book appointments with experts.

Waodate   Aug. 2020 - Dec. 2020

Dating platform connects singles throughout Vietnam   *NodeJS, ReactJS, Flutter, MongoDB*

- Attend daily meetings with the development team, offering progress updates and receiving assigned tasks.
- Take charge of implementing the feature for searching people around you.
- Assume responsibility for integrating the VNPAY API for payment.
- Develop the feature allowing users to subscribe to the app and purchase coins.
